

KNOW-MAN:

KNOWLEDGE NETWORK MANAGEMENT IN TECHNOLOGY PARKS

Dear Readers,

It is our pleasure to inform you that the INTERREG IVC project KNOW-MAN dedicated to knowledge network management in technology parks has just started its third and final year of implementation. The imminent project meeting organised in Spanish Seville on 8-10 February 2012 is an opportunity to recapitulate the achievements of the project so far as well as to set up the detailed agenda for the forthcoming activities in the final year of the project.

The primary objective of the meeting is to share knowledge on the activities which have been undertaken so far in all six partner regions. A special emphasis will be put on creating mechanisms which support the project's results in the regions after its completion. Therefore the discussion will focus on the results and perspectives regarding "regional round tables" organised in each partner region to communicate and discuss the project results and products such as the regional knowledge atlases – special tools for visualisation of regional innovativeness. Furthermore the partners will report from their expert tandems - a tool in which a minimum of two partners work on the transfer of instrument or policy from one region to another.

An important part of the meeting are the study visits in the AEROPOLIS Aviation Technology Park of Andalusia as well as Technology Park Cartuja and Marie Curie Incubator organized for the project partners.

The meeting will also concern the dissemination strategy of the KNOW-MAN project results in the partner regions and in the wider European forum. In particular the final project publications as well as the agenda for the international project conference organized in Berlin on October 2012 are going to be agreed.

Details regarding the forthcoming conference and extensive information about the KNOW-MAN project, including publications and reports, are available at www.know-man.eu. You are warmly welcome to visit our web site!
